Supermarket Billing System

This Supermarket Billing System will handle all the activities of super market. The main goal of this project is to convert the existing manual system to automated sales process system.

Features in this software:

User has to add customer details before generating billing details.

Each item has its unique code. By entering item code the system displays item description and item price.

The bill format has Customer name , Customer address, and customers contact number.

Administrator can update the items delivered or not and even he can check the payment status.

Administrator can add supplier details and item details with price.

This software has salary module which calculates employees basic salary, DA, HRA, TA automatically.

Administrator can create multiple users or employees in this system.

Administrator or users can change password by entering username, valid old password, new password and confirm password(repeat new password).

Software specifications:

Front end: Visual basic 6.0

Back end: Oracle

Database connection string:

con.Open

“dsn=VIJAY;uid=VIJAY;pwd=VIJAY”
